Software Developer

Bitcomm Technologies Pvt. Ltd. [19 Apr 2021 – 12 May 2022]

City: Noida

Country: India

Flutter Projects:

- **RDPMS (Present on the Play Store):**

Description: A monitoring/notifying app where users can see the data of IoT devices present on the field.

My contribution:

- Fixed all the major bugs that caused the app to crash and make it overall stable.
- Changed the whole internal architecture(code past also) of the app.
- Implementation of notifications based on the individual user access level rights.
- Create OTP Based login for registered users.

- **Support at Sena Bhavan(Army).**

Android Projects:

- **Configuration Tool (Internal Organisation App)(Android - Java):**

Description: A mobile app that allows the user to configure PCB/Chip-based devices using a serial port connector.

My contribution:

- Created the whole application from scratch.
- Supports more than 5 types of devices.
- Auto-Config facility (by uploading a predefined log file inside the app).

- **SSNS App(Present on Play Store)(Android - Kotlin) -**

Description: A maintenance logging app that records the values of all types of railway gears, which includes readings, picture capturing, voice records, signature, etc; entered by the user.

My contribution:

- Convert the app language to Kotlin for better feature addition.
- Make the app overall stable & faster than before.
- Made the app dual-language support.
- Created user-required APIs for new data.
- Added features that facilitated users to get data from IoT Server also.
- Converted the UI to a modern material style.
